

Title: AI Full Stack Engineer

Company: NovaTech AI

Location: Toronto, Canada (Hybrid)

About the Role:

We are looking for an AI Full Stack Engineer to build scalable AI-driven applications. You will work across frontend, backend, and AI systems.

Responsibilities:

- Build web apps using React and Next.js
- Develop backend APIs using Node.js
- Integrate AI models (LLMs, RAG systems)
- Deploy services on AWS (Lambda, S3, RDS)
- Collaborate with product and design teams

Required Skills:

- React, Next.js
- Node.js
- PostgreSQL
- AWS (Lambda, S3)
- REST APIs

Optional Skills:

- GraphQL
- LangChain
- Pinecone
- Docker

Experience:

3+ years

Education:

Bachelor's in Computer Science or equivalent

Salary Range:

\$100,000 - \$130,000
